A U-M faculty team is looking for 10 advanced-level health professions students to participate in an interprofessional educational activity utilizing simulation of a patient with diabetes being seen in an outpatient setting.

This is a great opportunity for students to:
- Learn about, from, and with each other to improve health outcomes for patients and populations.
- Work with other professionals to build and maintain a climate of mutual respect and shared values.
- Use the knowledge of your own role and those of other professions to appropriately assess and address the health care needs of patients via simulated interactions.
- Communicate with patients, families, communities, and professionals to support a team approach to health promotion and prevention of disease.
- Earn $25 just by participating.

If you are a student enrolled in one of the following programs, please contact your faculty member by March 15, 2018:

- **Medicine, MD**: Michael Clay: micclay@med.umich.edu
- **Physical Therapy, DPT**: Amy Yorke: amyorke@umflint.edu
- **Pharmacy, PharmD**: Paul Walker: pcwalker@med.umich.edu
- **Social Work, MSW**: Erin Khang: ekhang@umich.edu
- **Public Health, MPH**: Ebbin Dotson: edotson@umich.edu

We are looking for 2 students from each of the above Health Professions Schools in order to create two interprofessional Teams. The educational activity will be on the Ann Arbor campus, Friday, March 30.

If interested, respond quickly, as the faculty team will be selecting students in a “first contact, first enrolled” basis.
